LA11/2019/1000/F	The 33kV power line involves both the construction of above ground 33kV overhead line supported by wooden poles and underground 33kV cable laid below ground level in ducts. The proposed development connects the existing NIE Networks Strabane substation to a proposed substation building at the mine site; the substation at the mine site is proposed as part of planning application	From Strabane Main Substation adjoining address 89 Woodend Road Ballymagorry Tyrone BT82 0BP To Proposed Pole number 2001 located approx. 169m West of 37 Hollyhill Road Strabane BT82 0AB To Proposed Pole number 2137 located approx. 457m Wes

LA10/2017/124  
9/F.

The proposed 33kV connection is c37.9 km in length, comprising of c26.9 km of overhead line supported by single and double wooden pole sets and c11 km of underground cabling. c 22.8 km of the powerline is within the Derry & Strabane District Council area. c15.1 km of the powerline is within the Fermanagh & Omagh District Council area. The boundary where the powerline crosses between council areas between proposed pole 2220 and proposed pole 2221, is clearly marked on the attached planning maps. The proposed development comprises of an underground cable connected from the existing 110/33kV Strabane main substation which extends into an overhead line

between Hollyhill and Curlyhill Road from pole 2001. From this point, the overhead line route generally follows a south easterly direction which is undergrounded at various locations, mainly along public roads. The overhead line route terminates at pole 2322 before being undergrounded along Crockanboy Road and connecting into a substation at the Curraghinalt mine. This is illustrated by the purple line in the attached Proposed Route Map
